

# Kalix

## Superbly designed wall light suitable for hotels and commercial buildings

Kalix is an impressive and sleek range of elegantly profiled fluorescent luminaires which utilises the latest energy saving high performance 14W T5 lamps.

Manufactured from sheet steel, Kalix is available in white as standard and can also be supplied in silver-grey with a choice of 2 diffusing fascias to accommodate the ambience of their installation.

This unobtrusive but robust high quality high frequency luminaire provides an impressive soft diffused illuminance and its minimalistic low profile design creates a superb wall or ceiling mounted luminaire.

Available in single and twin 14W high-frequency mains versions, Kalix offers the option of integral 3 hour BSI approved emergency control gear which on mains failure ensures reliable emergency back up, achieving a Ballast Lumens Factor (BLF) of 32%.

The Kalix range of Luminaires are suitable as Slave Luminaires for use with central battery or static inverter systems and can be specified for use with self test or intelligent addressable emergency gear.
